Kalash Dhangare

Full Stack Developer · Python, Django, Flask

Nagpur, Maharashtra, India | kalash.r.dhangare@gmail.com | Immediate joiner

SUMMARY

Software engineer with a foundation in Python, Java, and data structures and algorithms, and hands-on full stack experience building and shipping a live client website. Background in Electronics and Telecommunication Engineering, with an interest in where hardware meets software. Ready to join a team immediately.

SKILLS

Languages: Python, Java
Frameworks: Django, Flask, Django REST Framework
Databases: MySQL, MongoDB, SQLite
API and tools: REST APIs, Postman, token authentication, Google Cloud, Git, GitHub
Fundamentals: Data structures, algorithms

EXPERIENCE

Python Developer

Dec 2025 – Jun 2026 · 7 months

Cyberathon Technology Pvt. Ltd · Nagpur, Maharashtra

- Built and launched the full website for KCOZM Salon, a premium salon chain, covering front end, back end and deployment (kcozmsalon.com).

Member

Jun 2023 – Jun 2026 · 3 years 1 month

GDSC JDCOEM · Google Developer Student Club

- Member of the college's Google Developer Student Club chapter for three years.

PROJECTS

KCOZM Salon website

kcozmsalon.com

- Delivered a production website for a real client, handling front end, back end and going live.

TicketDesk API

Django, Django REST Framework

- REST API for a customer support ticket system: customers raise and track tickets, support staff triage, assign and resolve them.
- Role-based access through the queryset, so customers only ever see their own tickets; comment threads on every ticket.
- Token authentication, filtering and search, pagination, request throttling, automated testing (15 tests), and a Postman collection with built-in checks.

EDUCATION

B.Tech, Electronics & Telecommunication

J D College of Engineering & Management

Higher Secondary, Computer Science

2019 – 2021

P.M.B.S. Arts, Commerce & Computer Science College & Convent

CERTIFICATIONS

- Google Cloud Computing Certificate
- Java with Data Structures and Algorithms
